## CLAIMS

- 1. A process for producing solubilized keratin, which comprises regulating the water content of keratin raw material to a hydrous state of 20 to 80%, hydrolyzing the same in an alkali solution, neutralizing the hydrolyzate liquid, and extracting a keratin hydrolyzate from the supernatant.
- 2. The process according to claim 1, wherein a cleaned keratin raw material is used.
- 3. The process according to claim 1 or 2, wherein the alkali concentration is 0.1 to 0.5 mol/L.
- 4. The process according to any one of claims 1 to 3, wherein the hydrolyzing process is executed in the condition of 80 to  $120^{\circ}$ C and 1 to 16 hours.
- 5. The process according to any one of claims 1 to 4, wherein peroxide is used in the neutralizing step.
- 6. The process according to any one of claims 1 to 5, wherein the keratin raw material is either wool or feathers.
- 7. The process according to claim 6, wherein the wool or feathers is clothes or bedding containing them, or waste wool or waste feathers.
- 8. A solubilized feather keratin having an average molecular weight of 8000 to 13000 (gel filtration method) and manufactured by the process according to any one of claims 1 to 7 using feathers as keratin raw material.
- 9. A cosmetic blend composed of the solubilized keratin manufactured by the process according to any one of claims 1 to 8.
